

Rush Case Charge – 50% will be added onto the final bill that was calculated using the current price list. If tissue processing is needed, then a \$50.00 processing fee will be added to the bill as well. This \$50.00 is NOT included in the calculations of the 50% added cost.

No more than three Rush Cases will be in process at any one time in the lab. No full time staff person in the lab will take on more than two rush cases at one time.

We cannot accept a “rush” case that has a very large number of tissues and/or blocks to process (a large number would be over 100).

We cannot accept a “rush” case that needs a technique or techniques that need to be modified or tried for the first time in the lab. We also cannot rush cases that involve extremely difficult or complicated tissues or processes (examples would be Golgi stained tissues, or tissues that were originally processed such that they need a great deal of technician time to properly cut).
