The Large Animal Compassionate Care Fund

Dedicated to providing valuable training to veterinary students and helping to save animals in need, The Large Animal Compassionate Care Fund has been established by the faculty of the Large Animal Hospital at the Texas A&M College of Veterinary Medicine & Biomedical Sciences.

The Initiative

Veterinary medicine, like human medicine, has made tremendous advances over the years and has entered an age of high technology and sophisticated treatments for our animal friends. At the same time, our former beasts of burden have become cherished members of our families. As you can imagine, the costs associated with advanced veterinary care can be very expensive and the need for this care does not always occur at the most opportune times, financially.

The Large Animal Compassionate Care Fund was created by faculty members of the Texas A&M Large Animal Hospital to provide financial assistance to owners of large animals who could not otherwise afford a life-saving procedure for their animal, especially those animals that might have to be euthanized due to prohibitive financial hardship to the family.

Our Objectives

The Large Animal Compassionate Care Fund was envisioned to help sick animals and families in need, while providing valuable training for veterinary students. The faculty members who established the fund realized that there was little educational value in euthanizing animals that could otherwise be treated, and paved the way for this remarkable fund.

Some eligibility criteria have been established for the fund:

- The animal must have a treatable disease or injury.
- The fund may contribute up to 50% of the total cost, with a maximum of $1,000 per case.
- The treatment must be performed at the Veterinary Medical Teaching Hospital (VMTH).

Your Support

A contribution to the Large Animal Compassionate Care Fund at the Texas A&M College of Veterinary Medicine & Biomedical Sciences not only gives you the opportunity to help families whose animals are in need of lifesaving medical treatment, but also makes you a member of the team working to educate future veterinarians.
Mark Francis Fellows

Private contributions provide the Texas A&M University College of Veterinary Medicine & Biomedical Sciences with the financial help required to maintain its vitality and to strengthen its national influence.

Giving

Although Texas A&M University is a state-assisted institution, it must rely on private contributions and support to maintain its excellence. When you have made one or more contributions totalling $1,000 to any of the development initiatives at the college, you become a Mark Francis Fellow. Fellows help meet needs in several fundamental areas including student scholarships and financial aid, equipment, public outreach, academic programs, research, and animal treatment.

Major Areas of Support

- Enroll the most talented students, regardless of their financial status
- Recruit and retain the very best scholars and teachers
- Provide environmental and technological resources conducive to learning and research
- Provide assistance to clients who may not otherwise be able to afford life-saving medical treatment for their pets
- Enhance innovative programs, such as practitioner involvement in clinical research, education, technology, basic research, new initiatives in patient care, and new thrusts in continuing education

Membership Levels

As Fellows continue to give to the college, they are recognized at the following levels:

<table>
<thead>
<tr>
<th>Level</th>
<th>Contributions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic</td>
<td>$1,000–$2,499</td>
</tr>
<tr>
<td>Maroon Level I</td>
<td>$2,500–$4,999</td>

Being a Mark Francis Fellow

Fellows comprise a select group of College of Veterinary Medicine & Biomedical Sciences advocates who find satisfaction in close involvement with a college whose achievements are immediate, tangible, and significant.

Fellows are people who are concerned about Texas veterinary medicine—people who recognize that the college is in a unique position to make important advancements for animals and human beings through education, research, and service.

Fellows are the leaders for voluntary giving and set the pace for other donors to the college.

As a Mark Francis Fellow, your gifts will enable Texas A&M University to continue its long-standing tradition of making a difference in veterinary medicine.

About Dr. Mark Francis

Dr. Mark Francis became the first professor of veterinary science at Texas A&M and was largely responsible for the establishment of the College of Veterinary Medicine in 1916. He served as the college’s first dean until his death in 1936.

Francis is fondly remembered for his pioneering efforts in the fight against the devastating Texas Tick Fever. He helped organize the Texas veterinary profession in 1903 and became the first president of the newly formed state organization, which later became the Texas Veterinary Medical Association (TVMA).
