

DEVICE REQUIREMENTS FOR THE PROFESSIONAL DVM PROGRAM

Students entering the [Professional DVM Program](#) must purchase one of the configurations described below. To satisfy the "Buy-Your-Own-Device (BYOD)" requirement for teaching and examinations in the Professional DVM Program, your device must be one of the systems noted below. The cost of each system includes a four-year maintenance agreement to accommodate computer needs throughout the four-year program.

Laptops Specifications (PC or Mac)

The table below details the recommended and minimum specifications that must be met.

Hardware	Recommended for PC	Recommended for Mac
Hard Drive	256GB or greater M.2 Solid-State Drive	256GB or greater Solid-State Drive
Memory	16GB – 32GB of RAM	16GB – 32GB of RAM
Operating System	Windows 10 Professional - Current version	OSX 10.15
Processor	Intel 10 th generation i7	Intel 10 th generation i7
Screen	13"- 15"	13"- 16"
Hardware	Minimum for PC	Minimum for Mac
Hard Drive	256 GB hard drive	256 GB hard drive
Memory	8 Gb of RAM	8 Gb of RAM
Operating System	Windows 10 Home 1803 or greater (S version not supported)	OSX 10.13
Processor	Intel 8 th Generation i5	Intel 8 th Generation i5
Screen	13"	13"
Other Requirements	PC	Mac
Microphone	Required	Required
Webcam	Required	Required
Internet Speed / Bandwidth	2.5 Mbps or better upload speed	2.5 Mbps or better upload speed
Software	PC	Mac
Office Suite	Microsoft Office (provided by CVMBS)	Microsoft Office (provided by CVMBS)
Anti-Virus Protection	TrendMicro Antivirus (provided by CVMBS)	TrendMicro Antivirus (provided by CVMBS)

Mobile Devices Recommendations

NOTE: Mobile devices are not supported with the test taking software.

The CVMBS **strongly recommends** that all students with mobile devices such as an Android phone, Android tablet, iPhone, iPad, or iPod touch have the most recent operating system. Please make sure your devices are set to be *automatically* updated by the vendor to ensure that your devices are always on the most current operating platform. ***Mobile devices are not supported with the test taking software.***

Security Recommendations

The CVMBS strongly recommends that students ensure their personal devices specifically laptops, tablets, and phones have ***disk encryption toggled on***. This will keep your data safe should your device be stolen. Please keep your decryption key in a safe place.

Things to Consider Regarding Security

- All software and Operating Systems (OS) should be set to ***automatically*** update which will ensure you have the latest patches. It is recommended to check with CVMBS Information Technology Services (ITS) prior to upgrading the OS higher than these recommendations.
- The CVMBS also recommends that students set their Screen Savers to the 10–15 minutes setting on all their devices. It is also suggested that students consider purchasing a privacy screen for laptops and or tablets.
- Make sure that passcodes and/or biometrics are enabled for devices to ensure data security.

Financial Aid

Students who will be seeking financial aid should be aware that the cost of a laptop computer, up to certain limits, can be added to the student's budget for purposes of computing financial aid under the guidelines of the U.S. Office of Education. Please note that students can only utilize this **once** while they are in the DVM program.

If you have questions about the financial aid application process, please contact Jamie Wigington via email at jwigington@cvm.tamu.edu or call 979.845.5054 for information, before purchasing your laptop.

NOTE: These requirements do not apply to students in the Biomedical Sciences Undergraduate Program or any of the Graduate Programs at the Texas A&M College of Veterinary Medicine & Biomedical Sciences (CVMB).
