DNA sampling:
We need 30-50 pulled mane or tail hairs with the root follicle attached. You may use either mane, tail or both, whichever is easier. Hairs must be pulled straight out to ensure follicles come out of the skin. It may be best to pull 5-10 hairs at a time rather than larger amounts. To send, write information about the horse on the form provided, on a blank sheet of paper or on the outside of a paper envelop. The information is the type that would be on a registration paper. At the bottom of the form or paper, tape the hair sample to the paper with clear tape, or just put the hair in the envelope with information on the outside. Do not tape over follicles. Extra hair can be trimmed. For single samples you can fold the paper and mail like a regular letter. If sending multiple samples, place each sample in an individual envelop and put all envelops in a larger envelop or box. You only need to fill in the boxes you know the information for.

SEE FORM FOR ADDRESS AND PAYMENT INFORMATION

We do testing for identification, parentage, and breed ancestry. Cost for these is $35. In addition we can do color gene testing and some disease gene typing. Pricing is different for these so please inquire.
### DNA TYPING

Please mail to: (Check made out to Texas AgriLife Research-VTAN)

Equine Genetics Lab
CVM, VIBS
TAMU4458
Texas A&M University
College Station, TX 77843
(979) 845-0229

$35 per animal tested
