

Blood collection and shipping

Collection:

- For **large animals**, send 5-10 mL blood in green-top (Sodium or Lithium Heparin) and 10-20 mL blood in purple-top tubes (EDTA).
- For **small animals**, send a minimum of 1-2 mL blood in green-top and purple-top tubes.

Shipping:

- Preferably overnight or 1-2 days mail.
- Please wrap the tubes in paper towels to prevent direct contact with ice bags and avoid freezing.
- Samples degraded during transit are sender's responsibility.
