

# Topic: Endocrine System

## Learning Objective/Outcome:

1. Identify the structures of the endocrine system
2. Describe the main functions of the endocrine system

## Keywords/Questions

## Notes

What body system does the endocrine system interact with?

How the endocrine system communicate?

Describe the function of the endocrine system.

Define target cells.

Explain the relationship between target cells and hormones.

Define gland.

Name the glands of the endocrine system.

Describe the hypothalamus.

Describe the pituitary.

Describe the pineal gland.

Describe the thyroid.

Describe the parathyroid.

Describe the thymus.

Describe the adrenal glands.

Compare and contrast adrenaline and cortisol.

Describe the pancreas.

Compare and contrast insulin and glucagon.

Describe the ovaries.

Describe the testes.

Summary
