Position Description

VETERINARY EDUCATION, RESEARCH & OUTREACH (VERO) DAIRY CATTLE VETERINARIAN

Department of Veterinary Large Animal Clinical Sciences
College of Veterinary Medicine and Biomedical Sciences
Texas A&M University
West Texas A&M University (WTAMU) Campus

The successful candidate will be expected to be a highly effective teacher, with their primary teaching efforts focusing on the 4th year veterinary student clinical rotations. The successful candidate will actively teach dairy production medicine through the VERO’s professional veterinary education program (e.g., senior veterinary clinical rotations and 2+2 curriculum). They will also be expected to teach and mentor VERO-CVM interns, residents, and graduate students. While the greatest time commitment and greatest expectation is for excellence in clinical service and teaching, the successful candidate will be expected to be effective in institutional citizenship, teaching and scholarly activity. The successful candidate will have the opportunity to teach dairy production in the WTAMU undergraduate Animal Science program.

I. Institutional Citizenship:

The successful candidate will participate actively in the VERO program on a daily basis as well as Departmental, College, University and specialty organization committee service and other leadership activities, and will demonstrate collegiality and a team-oriented attitude in all aspects of the position.

II. Teaching:

The primary focus of this position will be in providing clinical and didactic training of veterinary professional students through the VERO program. The successful candidate will collaborate with other faculty clinicians in teaching and mentoring of TAMU-CVM veterinary students, interns, residents and graduate students through the VERO program on the West Texas A&M University campus. This includes experiences provided in clinical senior rotations, the food animal and rural practice tour, veterinary summer internship programs, and didactic lectures and laboratories in the veterinary professional curriculum. The successful candidate will develop well-organized, creative lectures and laboratory materials for courses in the professional veterinary educational program in the TAMU CVM/VERO curriculum. The successful candidate will provide leadership that will enhance the quality and scope of the veterinary training program at VERO and provide guidance and mentorship of all students. Participation in continuing education presentations for practitioners in the state of Texas and participation in other state, national, and specialty meetings is expected. Support and training to regional producer groups and the agriculture workforce in the state of Texas is also expected. Excellence in teaching is expected of all faculty members in this department. The typical effort appointment of patient care and clinical teaching for this position would be 60%. The successful candidate will have the opportunity to teach dairy production in the WTAMU Paul Engler College of Agriculture and Natural Sciences, Animal Science program.
III. Patient Care:

Provide routine and emergency care for ruminant species to the WTAMU animal units.

- Provide collaborative care as part of teaching in senior veterinary clinical rotations.
- Supervise veterinary students, interns, and residents that are assigned to VERO clinical assignment, especially those assigned to senior dairy rotations.
- Conduct academic activities in a collegial manner with the clear understanding of team.
- Provide leadership that will enhance the quality and scope of the production aspect of patient-care.
- Participate in after-hours emergency duty that will be based on program needs and will be shared by the clinical faculty.
- Provide consultation to WTAMU faculty, industry professionals, clients and private veterinarians.

IV. Scholarship of Discovery, Integration, Application, and Teaching:

Scholarship activities of this position may include engagement in scholarship of integration and teaching, or participation in collaborative research. Examples of integration and teaching include writing book chapters, presenting continuing education seminars/laboratories, and developing/studying educational methodologies. Additionally, within the department, clinical or tenure track faculty are expected to develop collaborative research and support the research needs of WTAMU, VERO, and TAMU CVM colleagues as appropriate. All faculty are expected to publish the results of original work in high quality refereed journals and present research to peer groups. Each faculty member has the opportunity to provide and participate in continuing education presentations in state, national, and international settings.

This position description will be reviewed and may be amended by the Department Head in consultation with the faculty member according to the needs and interests of the department and professional goals of the faculty member.
