Position Description
Temporary Lecturer Position in Veterinary Radiology
Department of Large Animal Clinical sciences
College of Veterinary Medicine & Biomedical Sciences
Texas A&M University
College Station, Texas

The position is for a minimum duration of 1 week (5 business days) during the months of September 2020 – August 2021. The locum radiologist must have a DVM/VMD or equivalent degree and be board certified by the American College of Veterinary Radiology (ACVR) or the European College of Veterinary Diagnostic Imaging. The candidate must be eligible for licensure in the state of Texas and licensed prior to employment.

The locum radiologist will be expected to provide diagnostic imaging services and contribute to instruction of interns, residents, and students. The locum radiologist may be assigned to small animal ultrasound, small animal radiology (which includes radiology, CT, MRI and nuclear medicine) or large animal radiology (which includes radiology, CT, MRI, and nuclear medicine). The clinical assignment to the different imaging services will be based on clinical needs and professional interest and expertise of the locum radiologist.
